COLLEGE OF ENGINEERING AND INFORMATION TECHNOLOGY

THESIS/CAPSTONE PROPOSAL HEARING

Evaluation Rubric and Score Sheet

Program:	[ ] BSEE [ ] BSCpE [ ] BSIT
Date and Time:	***May 28, 2026***
Thesis/Capstone Title:	***A Role-Based Secure Internship Management and Decision Support System with Anomaly Detection for Evaluation and Performance Monitoring***
Member(s) / Presenter(s):	1. Jason P. Hechanova 2. Bianca Marie Better 3. Mike Cedrick M. Tisbe
Adviser	**Mario Caday**
Panel Member	

PART 1: GRADING RUBRIC (100 pts. Total)

Instructions for Panel: Score the proponents based on the rigor of their printed manuscript (Chapters 1-3) and their ability to defend their proposed architecture and methodology during the oral presentation.

Item Code	Area and Max Score	Score
1. Chapter 1: Problem Formulation and Objectives (30 pts.)		
PFO1.1	Introduction and Project Context [10 pts.]: Clearly defines the industry/sector overview and establishes a valid, real-world problem with properly cited current pain points.	
PFO1.2	Objectives [10 pts.]: General and Specific Objectives are measurable, achievable, and logically mapped to the development phases.	
PFO1.3 Scope and Significance [10 pts.]: Boundaries and constraints are clearly set. Beneficiaries are well-identified and mapped to a specific SDG or University Research Agenda.		
2. Chapter 2: Literature and Theoretical Soundness (20 pts.)		
LTS2.1 RRL and RRS [10 pts.]: Academic literature and existing systems are highly relevant, current (last 5 years), and comprehensively analyzed.		

COLLEGE OF ENGINEERING AND INFORMATION TECHNOLOGY

LTS2.2	Synthesis and Research Gap [5 pts.]: The proponents successfully synthesized the reviews and explicitly proved a valid "Research Gap" that their project will address.	
LTS2.3	Theoretical/Conceptual and Technical Background [5 pts.]: Methodological soundness is proven via a clear IPO diagram, established scientific theories, and a solid understanding of the chosen modern components/technologies.	
3. Chapter 3: Methodology and System Architecture (40 pts.)		
MSA3.1	Research Design and Development Phases [10 pts.]: Appropriate research approach (e.g., SDLC for IT, Experimental/Engineering Design for BSCpE/BSEE) is justified and detailed step-by-step.	
MSA3.2	Technical Description and Architecture [20 pts.]: Visual blueprints (ERDs, Schematics, AI models, UI/UX wireframes, etc.) are logically sound. Hardware/Software requirements are fully itemized.	
MSA3.3	Requirements and Mathematics/Statistics [10 pts.]: Functional and Non-Functional Requirements are distinct and clear. The mathematical foundation (load computations/algorithms) and Statistical Treatment for future testing are correct.	
4. Oral Presentation and Proposal Readiness (10 pts.)		
PPR4.1	Defense and Justification [5 pts.]: Ability to confidently answer the panel's technical queries and successfully justify their chosen architecture and methodology.	
PPR4.2	Delivery, Mastery, and Manuscript Compliance [5 pts.]: Proponents demonstrated professional oral delivery and a deep understanding of the proposed solution and the printed manuscript strictly adheres to IEEE formatting, grammatical standards, academic integrity checks, and includes all required CEIT forms and appendices.	
TOTAL SCORE		

PART 2: FINAL SCORE and VERDICT

Final Calculated Score: _____ / 100

Check the appropriate verdict based on the final score:

- **[ ] PASSED/APPROVED (No Revision) [95 - 100]** - Outstanding Proposal

COLLEGE OF ENGINEERING AND INFORMATION TECHNOLOGY

  - No changes required; the group is cleared to immediately proceed to Chapter 4 / Prototype Development and the rest of the documentary requirements.
- **[ ] PASSED/APPROVED (Minor Revision) [80 - 94]** - Successful Proposal
  - Comply with cited minor revisions (typographical, formatting, or slight scope adjustments) prior to proceeding to development.
- **[ ] PASSED/APPROVED (Major Revision) [60 - 79]** - Core Methodological Adjustment ■ Significant corrections needed in the system architecture, objectives, or methodology. Must be revised and approved by the adviser before actual development can begin.
- **[ ] REDEFENSE [50 - 59]** - Subject for Special Schedule of Presentation
  - The proposed research gap is invalid, or the methodology is fundamentally flawed. The group must propose a revised architecture or a new topic and present it again to the panel.
- **[ ] FAILED [Below 50]** - Subject for Course Re-enrollment
  - The proposal lacks academic integrity, is plagiarized, or no presentation was conducted.

PART 3: REVISIONS / COMMENTS and SUGGESTIONS / RECOMMENDATIONS

Item Code	Revisions / Comments and Suggestions / Recommendations
